

Rear Grab Handle

Jeep Wrangler JK 2d or 4d 2007-current

INSTALLATION INSTRUCTIONS:

1. Remove the two 6mm bolts on the bottom side of the roll bar using a 10mm socket.

2. **NOTE: We recommend adding a drop of oil or WD-40 to the bolts before installing to remove the thread locker Jeep puts in the threads from the factory.**

Install the rear handle with the bend facing the front of the Jeep using the two supplied M6 bolts. It works best if you install the front bolt first only threading in a few turns, then install the rear bolt and using a 5mm hex wrench, tighten both bolts to 120 in-- - lbs of torque.

3. Repeat the procedure for the other side.
